April 10th, 2015

Dear Parent/Guardian,

In the coming weeks, your child will be participating in our fieldtrip program (the Science Creative Literary Symposia). This fieldtrip also has an associated research project, which would benefit greatly from your child's participation. Note that this is voluntary and choosing not to participate in the research does not affect your child's involvement in the fieldtrip itself. Please take a moment to look through the contents of this package, where you will find:

- 1) A double sided single page document containing a letter of invitation to participate for parents (on one side) and a letter of invitation to participate for students (on the other side)
- 2) A double sided document containing a detailed description of the study for the parents (pages 1 to 3), a consent form for parents to sign (pg 4) and an assent form for students to sign (pg 5)
- 3) An envelope that you can use to return the consent and assent forms to your teacher.

Note that the letters and research description may be kept for your records, whereas the signed consent and assent forms are to be returned to your child's teacher by the date instructed by the teacher.

Thank you in advance for your consideration and do feel free to contact me with any questions.

David Ng
Director and Instructor, Advanced Molecular Biology Laboratory,
Michael Smith Laboratories, U.B.C.
